I urge the Mandeville City Council to be the driving force for the passage for plans for Sucette Harbor. The benefits to the city and parish of increased tax and sales revenues are projected to be tremendous. Our town needs a boost! It is time for Mandeville to mature and look what is best for our community.

Respectfully

Dear Council Member,

With regard to the Sucette project:

What businesses are being proposed in the project?

Why was Sanctuary mentioned in the mail out?

Are the residences rentals or purchases?

Mandeville needs better choices for grocery shopping. Rouses dominates. We can't even get a Trader Joe's but we get a small Target that is greatly lacking inventory. Our town is besieged by unnecessary projects and junky stores like Five Below and Ross. Now this.

There needs to be mail outs to Mandeville residents regarding planning and zoning meetings where multiple questions can be asked and pros and cons explored with regard to Sucette. I for one am not opposed to progress but I need a lot more info before I could vote yes for this. And I don't want to contact Sucette Harbor. They won't share the negatives. I need to hear all points of view from appropriate sources.

Last: who chose Sucette as the name for this project??? SUCK-ette??? Surely something nicer could have been chosen! Is this a joke?

Dear All:

I am contacting you today as a resident of old Mandeville since 2005 (pre-Katrina). Since arriving here 18 years ago, I have seen our little community expand and mature rapidly due mainly to natural events. Have we encountered more traffic? Well, yes! In turn, Mandeville has responded by widening roads and making traffic circles. This is considered "progress". Without change, progress does not come and without progress a city like Mandeville stagnates and soon dies. Believe me as I've lived in that city. I was raised in that city and unfortunately, my entire family has left "that city". Don't allow small minded individuals to suppress progress. People are always afraid of the unknown. It's second nature. There are risks worth taking. You were chosen because someone took a risk on You! Now we're asking You to take a risk on the future of our beloved Mandeville. She needs you to believe in her so that she too can have a future. Give Sucette Harbor Your support and watch Mandeville's progress surpass your expectations.

Sincerely,
